

# Point-in-Time Notes for IL-514 - DuPage County CoC

Date of PIT Count: 1/27/2021

Population: Sheltered and partial unsheltered count

## Notes

Homeless families with children increased significantly in emergency shelter. ES households with children increased from 12 to 46 and persons in households with children increased by 120 from 41 to 161. The hotel model for shelter instead of congregate pads was better suited for the children. Most of these families were in unstable housing such as hotels or living with family and friends. They were not coming from a personally leased unit so the eviction moratorium and rent assistance did not help them. When they exhausted their own resources, there was not much of a safety net for their situation. The shelters are working on ESG-CV funds as a way to develop stable housing for these families and apply to the DuPage Housing Authority for vouchers since they have opened up their lists.

Homeless individuals in emergency shelter decreased from 136 to 117. This was because families were prioritized and there was more need than capacity.

Unsheltered count was a head count only. No demographic data captured. Unsheltered persons increased from 10 in 2019 to 37 in 2021. Since it was an observation only count, there is no information on the persons history so the reason for the increase is unclear.

### **All Homeless Populations: Households with at least one Adult & one Child**

Homeless families with children increased significantly in emergency shelter. ES households with children increased from 12 to 46 and persons in households with children increased by 120 from 41 to 161. The hotel model for shelter instead of congregate pads was better suited for the children. Most of these families were in unstable housing such as hotels or living with family and friends.
